PREVENTION OF NUCLEAR WAR**  
23<sup>rd</sup> World Congress – Mombasa, Kenya  
April 2023

**INTERNATIONAL COUNCIL RESOLUTION**

Title of Resolution: **Survey of all national IPPNW affiliates**

Submitted By:

Urs Rüegg on behalf of Swiss PSR-IPPNW Council

Affiliate: Swiss

Date Submitted: 23 April, 2023

Received By: IPPNW Resolutions Committee

**Be it resolved that:**

IPPNW conducts a survey of national affiliates in order to elicit information that can be used to share interests and methods, create common projects, and increase our togetherness and efficiency in achieving our common goals. It would enable the Central Office to know what kind of expertise is available in which affiliates, and thus to draw on it and coordinate approaches with other groups having expertise to be shared or transferred.

**Reasons for above:**

The strategies and priorities of the national IPPNW affiliates are not well known.

The European affiliates of IPPNW have made a pilot survey of 8 national affiliates that turned out to yield valuable information that was good to share. The survey was well-received by the respective international councillors.

From the results gathered from an IPPNW-wide survey, we expect to find topics, which can be used to further improve our work, strengthen interactions between affiliates and detect potential areas of cooperation. In addition, it will increase the cohesion between IPPNW Affiliates.

**Describe how this resolution might be implemented and by whom:**

The Central Office, perhaps together with the "Geneva desk", should organize this survey. It will be as confidential as any item that is transferred via the internet.

**Estimate for amount of staff time and resources required to implement this resolution:**

Staff time 5% of a qualified expert during 2 months.

Resources: some survey software should be acquired (€ 300±100)

**Estimated expenses and sources of funding:**

€ 300±100 from the budget
